The certification fees will be due with the first initial certification and the annual fees of all certified products will be due to **April 1st** each year in advance. The first annual fee will be charged together with the initial certification fee proportionate to the time left for the next due date on base of a monthly rate. If the certificate is issued after **1st of October** the validity of the first certificate additionally will be extended to the successive period.

Initial and Re-certification fee (per certification process)	300 EUR
Certification fee for each product	50 EUR
Issuing of certificate	60 EUR
Annual certification fee per certificate	120 EUR
Annual fee per certified product	24 EUR

Validity of Certificate

The certification of a BACnet product expires after 5 years. However, the certificate is valid for one year only. It is automatically extended for another year except

- the manufactures decided to stop certification of the product by informing the certification body in time before the reissuing of the certificate
- the product is no longer manufactured anymore and the certification body is informed in time,
- the annual certification fee is not paid.

To maintain the certification beyond the period of 5 years a re-test of the BACnet conformity at the end of the period has to be performed. On successful retesting the certification is extended for another 5 years.
